Africa Broadband Maps | ITU

REGIONAL COMMUNITY OF PRACTICE | DISCUSSED ON MONDAY 30 NOVEMBER

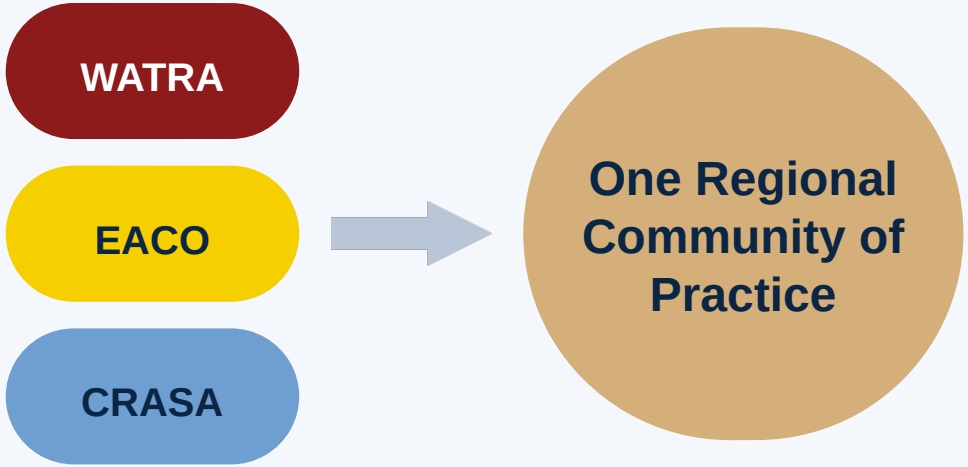
OUTPUT/1

Investment Mapping and Prioritisation Guidance

The draft for the CoP members, the question they answer, and how each CoP sends one common position to ITU by 26 November.

West Africa CoP | East Africa CoP | Southern Africa CoP

One standard and one Community of Practice



EXPECTED OUTCOMES

1. Agreement on a common data standard and data sharing approach

2. One Regional Community of Practice in place of three sub-regional groups

3. A start on investment readiness; investment planning in 2027-2028

OUTPUT/1 | DISCUSSED ON MONDAY 30 NOVEMBER

Investment Mapping and Prioritisation Guidance

WHAT IT IS

A common way to use broadband maps to identify, rank and present investment needs.

WHY IT MATTERS

A map only helps investors if it answers their questions: where coverage is missing, who is affected, what already exists nearby and what it would cost.

IN BRUSSELS

Day 1, Monday 30 November

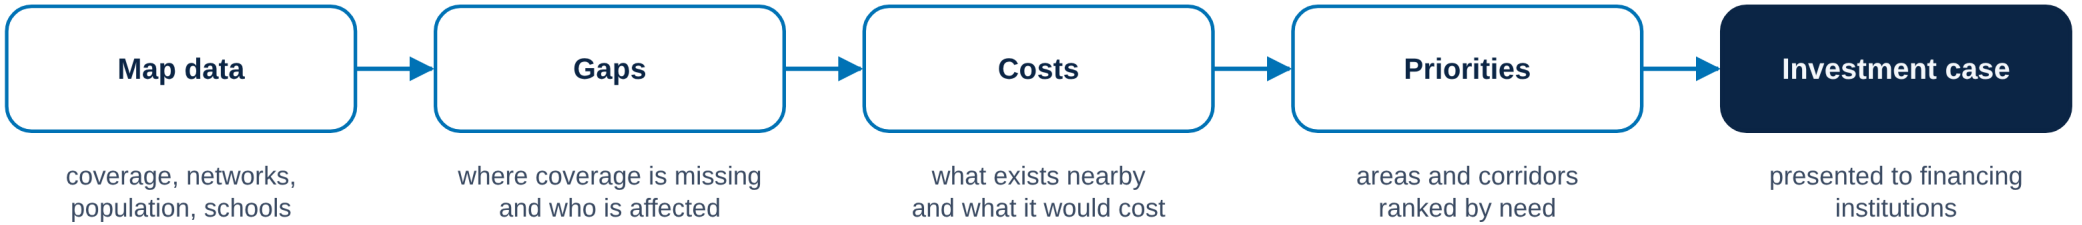
Broadband data and investment readiness

Corridor investment simulation in front of a donor panel, with fictitious countries and figures.

Adopted with the other two outputs on Thursday 3 December, by consensus.

OUTPUT/1 IN ONE PICTURE

From map data to an investment case



OUTPUT/1 agrees one common way to go from map data to an investment case.

FOR YOUR MEMBERS, TO ANSWER BY THE DATE YOUR CHAIR SETS

One question for your members

INVESTMENT DATA

Which of the data that financing institutions ask for are generally available in our sub-region, and where are the main gaps?

What financing institutions need is taken from reference sources (EU Broadband Investment Handbook, ITU ICT Infrastructure Business Planning Toolkit), not asked from you.

No country figures are needed. Answer from experience and for the region: no country is singled out.

FROM NOW TO BRUSSELS
